

# SKIN & COAT TREAT

Dog & Cat – For all Life Stages

## Recipe Claims

### Added Omega 3 Supplement

Provides Omega 3 essential fatty acids to help support gloss & softness.

### Contains EPA & DHA

To help reduce the build up and production of dandruff by maintaining cellular structure and 'locking in' moisture.

### Contains Zinc & Biotin

This recipe contains zinc & biotin which can help in maintaining a healthy skin and shiny coat.

### No Added Grain

This recipe is designed to be suitable for those with grain intolerance / sensitivity.

### Added Vitamins & Minerals

Added Vitamins & Minerals which are essential for a pet's overall health.

### No Added Artificial Colours & Preservatives

Naturally preserved using rosemary extract.

## Why Skin & Coat?

The skin and coat form the single largest organ of a pet's body and is the first protective barrier from the outside. This recipe has been formulated to help support healthy skin & a shiny coat.

Important: The information provided in this document is GA Pet Food Partners Ltd interpretation of Regulation No 767/2009 including amending Regulations 2017/2279 and 2018/1903. As with all legislation only courts can decide on the correct interpretation of the law. We would advise that you always seek legal advice when creating/printing new packaging, leaflets or websites. The statutory Analytical Constituents declaration parameters (i.e. Crude Protein, Crude Fat, Crude Fibre, Crude Ash) may be used for declaration purposes along with Moisture. Other parameters are intended as a guide and in order to declare extra figures we suggest that analysis work is carried out to confirm levels more precisely. Formulation updates: As information becomes available and in order to continually meet statutory analytical constituent declarations, formulations may have to be adapted to account for raw material variation and availability. There may also be other reasons outside of our immediate control (including but not limited to force majeure events) which warrant the change of a formulation to improve its suitability.
